-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

It appears that the applicant has filed foreign priority papers yet has failed to claim priority.

The applicant's information disclosure statement dated 12/12/2005 has been considered and a copy has been placed in the file.

The disclosure is objected to because of the following informalities: In paragraphs [0007] and [00009], the applicant refers to claims which is objected to.

Appropriate correction is required.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, lines 1-2, there is a lack of antecedent basis for "the window panes". Throughout the claims, the applicant uses phraseology "preferably" which is indefinite and fails to positively recite the claimed invention.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-10 are further rejected under 35 U.S.C. 102(b) as being anticipated by U.S. patent to Kaye et al. (6,409,251 B1). Kaye et al. (6,409,251 B1) disclose a weather-strip (see Figure below) comprising a sealing section (44, 46, 48, and 50), a U-shaped fastener section (66, 68, 70, and 76) having a metallic carrier, and a plastic trim strip (40) positively connected to the fastening section (66, 68, 70, and 76). Kaye et al. (6,409,251 B1) further discloses the plastic trim strip (40) comprising a first hooked section (90) extending within a first recess (86) and second hooked section (98) extending within a second recess (84). Kaye et al. (6,409,251 B1) still further discloses a retaining segment (80), a supporting lip (70), and a U-shaped metallic carrier (60).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerry Redman whose telephone number is 571-272-6835. The examiner can normally be reached on M-F from 8 to 6.
